Justin Herdman

US Attorney's Office

Justin Herdman was sworn in as the United States Attorney for the Northern District of Ohio on Aug. 21, 2017. He brings a depth and breadth of experience to his position representing the United States in court in Ohio's northern 40 counties, including Cleveland, Toledo, Akron and Youngstown.

Herdman was an Assistant United States Attorney from 2006 through 2013, serving as Deputy Chief of the National Security, Human Rights, and Organized Crime Unit. He was responsible for investigating and prosecuting national security crimes, including the successful trial and appeal of a homegrown terror cell that sought to support al Qaeda. He was also part of the prosecution team of five self-proclaimed anarchists convicted of attempting to use explosives to blow up a Cleveland-area bridge.

Immediately prior to becoming U.S. Attorney, Herdman was a partner at Jones Day, where he represented businesses and individuals under investigation.

Before returning home to the Cleveland area, Herdman was an Assistant District Attorney in New York City, working for the legendary District Attorney for the borough of Manhattan, Robert M. Morgenthau, where Herdman prosecuted a wide range of violent crime and identity theft cases.

He serves as a Judge Advocate in the United States Air Force Reserve and is a former intelligence officer in the United States Navy Reserve. He earned his B.A. from Ohio University, his M.Phil. from the University of Glasgow, and his J.D. from Harvard Law School.

Toledo Rotary Club Foundation Awards Grant to Hospital Council of NW OH Pathways HUB —\$10,000

The Toledo Rotary Club Foundation recently awarded a grant in the amount of \$10,000 to the Hospital Council of Northwest Ohio Pathways HUB. The goal of the grant is to provide services to 30 at-risk or disadvantaged women, who would not otherwise qualify for Pathway's services due to being privately insured. The grant helps fund enrollments for women who work, who have private health insurance, but who still struggle financially and have other social needs such as transportation, housing, baby items, etc. Thus far, nine women have received services with this funding. Many of these women were employed (44%) or actively looking for work (33%). Two women were provided assistance to apply for, and received Medicaid funding. The remaining grant balance will allow the Pathways HUB to continue to provide additional services to at-risk or disadvantaged pregnant women.

Pregnant women need early and regular prenatal care to help ensure their babies are born full term and at a healthy weight. Unfortunately, not all women have a support system to help care for themselves, manage stress and receive prenatal care. The Northwest Ohio Pathways HUB regional care coordination system launched in 2007 to combat infant mortality in Lucas County. Since then, low-income pregnant women have been connected to the medical care and social services needed to have full-term, healthy weight babies.

The Pathways HUB system relies on community health workers and other care coordinators employed by multiple clinical and community sites to assist those in need by working with them to develop a care plan and overcome barriers. Pathways HUB staff coordinates and trains community health workers and other care coordinators, as well as tracks intervention results.

How the funds were allocated for the nine women thus far:

9 Enrollments— \$100 each

5 Prenatal Visits—\$50 each

5 Social Service Referrals—\$50 each

2 Reproductive Life Plans—\$25 each

NewsSlide

NewsSlide, in the opinion of Kurt Franck, is an “adventure”. It brings news and information to consumers, and is a way to reach younger generations who get their news from multiple sources. NewsSlide allows advertisers to let their customers play, listen and see advertising messages. NewsSlide was launched in October and has been improving since the start. John Crisp said that people today are bombarded by thousands of messages via digital news, social media, etc. Getting your message out and telling your story effectively is getting more difficult in the world. A message has to make someone’s life better in order to have any impact, it has to be relevant and current. NewsSlide was designed for prolonged engagement, including stories, photo galleries and videos. Content can be updated multiple times throughout the day, keeping the news fresh and relevant. The free (for now) app is aimed toward members of Generation Z. Advertisers have a hard time reaching this group because they are always on electronic devices—whether it’s their phones or a gaming system. This generation also tends to watch non-traditional television, such as Netflix. NewsSlide was made to evolve and continue to change with technological advances. The move away from print toward digital is what drove The Blade to adapt to the changing world and create NewsSlide.
