**DAVID WELCH,
DIRECTOR OF
ENVIRONMENTAL HEALTH
TOLEDO LUCAS COUNTY
HEALTH DEPARTMENT**

**Lead, know the danger with in. Know your role.
Know your responsibility.**

Lead poisoning is a serious health threat to our children under the age of 6 years old. This is the time when their bodies are rapidly developing and lead poisoning harms their development, especially the development of the brain and nervous system. Effects of lead poisoning such as lower cognitive skills, hyperactivity, learning disabilities are irreversible and will remain with the child for the rest of their life.

Lead based paint is the primary source of lead poisoning in our children. Lead paint was banned in 1978, unfortunately those homes built before 1978, over 100,000 homes in the Toledo area still pose a risk for lead poisoning.

Approximately 3,400 children in Lucas County have some level of lead poisoning.

Lead poisoning is preventable. Learn how to prevent lead poisoning and if you have a child under 6 years of age in Toledo, have them tested for lead – it's the law.

Therapy Equipment Upgrade

We are requesting funding to purchase new therapy equipment in efforts to increase the quality of our therapy service delivery. Our therapist work with children and adults that have intellectual disabilities. The items that we are requesting will help assist Anne Grady Services in helping people meet their therapy goals and adjust to heights that are easily accessible for the children we serve as well.
